## Work Experience

JUNE 2021 - AUGUST 2023

### Senior Full Stack Developer @ [Parsley Health](#)

At Parsley Health, a healthcare company that focuses on providing personalized and holistic primary care services, I collaborated on impactful projects ensuring timely and budget-compliant deliveries. As part of my responsibilities:

- Collaborate on the [website](#) migration from wordpress to gatsby, including the creation of react components in a storybook for use across multiple websites.
- Collaborate in the development and ongoing maintenance of core [checkout flow](#), enabling users to effortlessly purchase a membership. Additionally, led implementation of Cypress tests throughout all purchase pathways, guaranteeing thorough testing coverage.
- Implement A/B testing tools and methodologies to drive optimization and glean valuable insights considering user metrics to discern user preferences and behaviors to achieve organizational goals.
- Creation and implementation of endpoints using grpc and graphql, enabling users to have full control over their medical appointments.

`typescript` `react.js` `node.js` `graphql` `next.js` `tailwind` `aws`

JULY 2019 - JUNE 2021

### Full Stack Developer @ [Quext](#)

At Quext, a property management platform designed to empower managers and leasing agents by streamlining workflows and automating tasks, all with the goal of elevating property value and enhancing the resident experience. As part of my responsibilities:

- Collaborate in the creation from scratch of an [app](#) that empower individuals to find the perfect apartment that suits their needs.
- Drove improvements to enhance the user experience and functionality of a property

rental application.

- The development and maintenance of a content management system (cms) enabling property owners to effortlessly manage their residences.
- Design, and development of API's.

typescript react.js node.js nest.js vue.js tailwind postgresql

JUNE 2018 - JUNE 2019
